Landscape Lighting
... Bringing Color to the NightSM

Challenge Traditional Design

Design Without Boundaries

adding color to a lighting system becomes a realistic design option.....

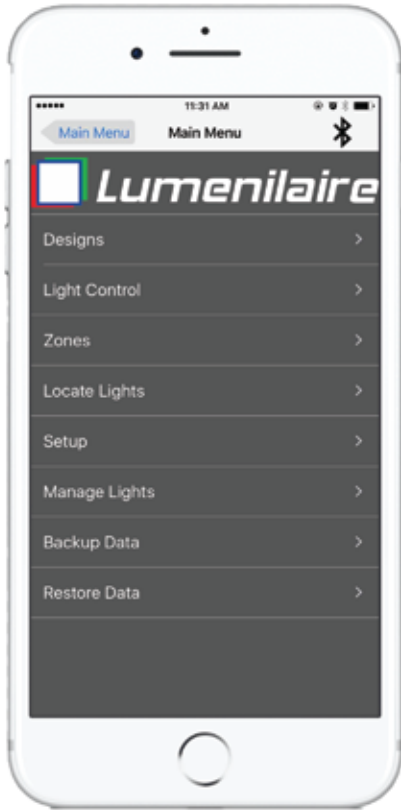

- ☀️ A Japanese maple can be given a touch of red.....
- ☀️ A blue spruce can be accented to bring out its true color.....
- ☀️ Fall colors can be drawn out.....
- ☀️ Warm things up in the spring.....
- ☀️ Create a winter white scene.....
- ☀️ Colors can be added to an evening of entertaining.....
- ☀️ Instant holiday and event decorating.....
- ☀️ Celebrate a victory and show your team colors on game day.....

All of the capabilities of a traditional 12V outdoor lighting system still exist as it relates to color temperature, curb appeal, familiarity, and ease of installation. Lumenilaire gives you the ability to manipulate light output at each individual fixture, create scenes, zones, and fixture groupings, all controlled wirelessly from your smart device.

Re-Think Control

The Design Tool

complete wireless control of individual fixtures from your smart device.....

design it

Design beautiful colorscapes

control it

Select the perfect color for your design and dim your scenes

zone it

Design unlimited zones to create unique vignettes

locate it

Easily find the individual light within your lighting system

set it

Easily set system information

manage it

Simply control your lighting system

save it

Save your designs and share them among other devices

Endless Capability • Limitless Creativity

traditional curb appeal and color now have a secret weapon.....

Change The Install

simple installation and set-up.....

- unlimited fixtures controlled
- no complex wiring or transformers
- traditional 2 wire install
- add fixtures to existing lighting system
- control light output via your mobile device
- network* area of light control
- each light is independent
- automatically add light to app
- no wifi required

*creates a relay of lights with unlimited range

Pre-determining appropriate wattage, intensity, and even color options can be often painstaking, time consuming and costly. Now, all can be done after the installation is complete with no additional hardware, multiple lamp options, labor, or complex wire schematics.

As the landscape grows, matures, and changes, adjustments can be easily made to address the need for more light.

Limitless Design

Create dynamic designs using Lumenilaire products.....

Well Light

Rugged cast brass top with corrosion resistant canister 12W, sealed both above and below ground
#10427-RGBWW

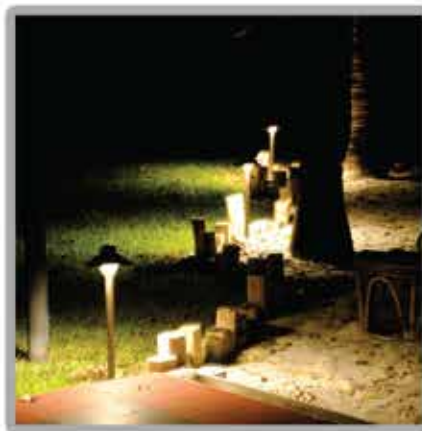

Square Flood Light

5.266" H X 3.76" w
Stake included Par20 light engine
#16727

Uplight Large

Solid cast brass
24" overall height, 9" diameter hood
Stake included, 12V 3W
#13527-RGBWW

Path Light

Brass finish
23" overall height, 5" diameter hood
Stake included, 12V 3-4W
#13427

Well Light

Rugged cast brass top with corrosion resistant canister 12W, sealed both above and below ground
#10427-RGBWW

Underwater Light RGBWW

Underwater fountain, waterfall, pond lights
forged brass, underwater light
12V low voltage fixture, 25' lead wire
#131027-RGBWW

Puck Light

12V 4W
Stainless steel
#16627-RGBWW

Rope Light

High output rope lighting commercial grade
LumenNode controlled color mixing, dimmable
DC12V SMD5050 60LEDs/m
3-IN-1 RGB+WW (3000K)
Silicone tube, waterproof IP67, 5 meter/reel
#20027

RGBW Linear Light Bar

High output leds, dimmable output
RGBW 2700K combinations
Wireless LumenNode included
5' of wire between lumennode and linear
3' of 12V wire
#16100

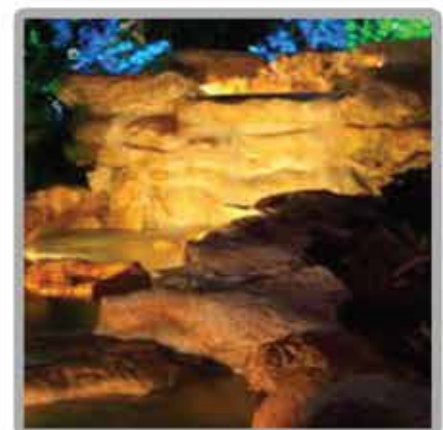

Linear Light Fixture

8 x 3.5 x 125
Opaque glass for subtle lighting
#28218

Sconce Light

Dimensions 7" X 4" X 2.45"
Solid cast brass sconce
Up/down light output, 12V input
#166027

Underwater Light

Underwater fountain, waterfall, pond lights
forged brass, underwater light
12V low voltage fixture, 25' lead wire
#131027-RGBWW

Traditional Uplight

Solid cast brass
10.25 height, 2.225" diameter
Stake included, 12V 1W per color
#13827

Puck Light

12V 4W
